### Seeding Innovation: Launching Careers

Since 1953, the American Psychological Foundation has supported innovative research, scholarships and projects for students and early career psychologists, working to make a difference in people's lives. APF's work would not be possible without the generosity of psychologists from around the world.

#### Donor Spotlight

"Contributing to APF is one way to leave the world a bit better than we found it."

Kurt Geisinger, PhD, and Janet Carlson, PhD, talk about why they give to APF.
